

PCR Grade Water

MADE IN DENMARK

Cat. No.: A360056

A360056

-	PCR grade water
ID No.	5401000
Cap colour	Clear
Content	6 x 5 ml

General Description

PCR is a powerful and sensitive method, able to detect the DNA of as little as one copy of a gene. This extreme sensitivity also leads to the amplification of any contaminating DNA that might be present in the reaction. Therefore, setting up a PCR requires highest standards in pipetting routines and the utmost purity of the utilized reagents. Since water takes the largest volume, special care has to be dedicated to its source and quality.

Ampliqon offers high quality PCR grade water in convenient 5 ml aliquots.

PCR Grade Water

Ultrapure H₂O, free of endonuclease-, nicking-, and exonuclease activity, free of human DNA

Recommended Storage and Stability

Store at -20 °C to +25 °C.

Product expiry is stated on the label.

Quality control

The PCR grade water is tested for contaminating activities, with no trace of endonuclease activity, nicking activity or exonuclease activity. Absence of human DNA is tested by PCR.
