

TAQ DNA POLYMERASE

High performance Taq DNA Polymerase

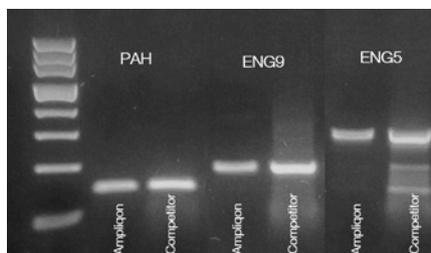

- High product yield
- dUTP incorporation possible
- Processes up to 5 kb
- No proofreading – lacks a 3' - 5' exonuclease activity
- Leaves 3'dA overhang

Ampliqon Taq DNA Polymerase is a thermostable, recombinant DNA polymerase, which exhibits very high activity. Ampliqon Taq DNA Polymerase is suitable for most routine PCR applications requiring high yield and reliable DNA amplification. The 5'-3' exonuclease activity leaves 3' overhang, convenient for direct T-A cloning.

Comparison

Comparison of Ampliqon Taq DNA Polymerase with competitor Taq DNA Polymerase. Three different primer targets (PAH, ENG9 and ENG5) were evaluated. Ampliqon Taq DNA Polymerase performed equally well with competitor Taq on these 3 targets
