

G2 DNA/RNA ENHANCER

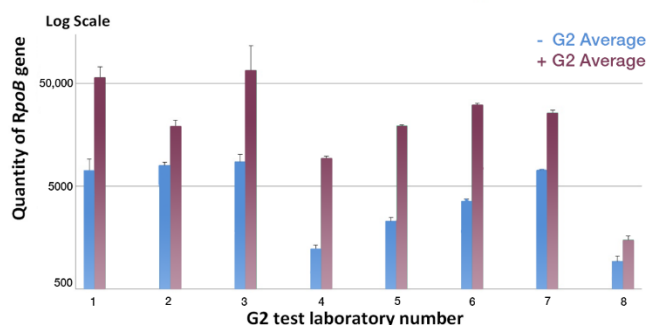

DNA/RNA extraction

- Inhibition of DNA and RNA sorption to clay particles.
- Increase microbial DNA and RNA yield from clay - at least 2-10 fold.
- Optimizing DNA and RNA extraction efficiency.

G2 DNA/RNA Enhancer is convenient to use, when optimal DNA and or RNA extraction yield is required from especially clay. The primary function of G2 DNA/RNA Enhancer is to relieve inhibitory DNA-clay particle formations. G2 DNA/RNA Enhancer should be used in combination with either standardized extraction methods or commercial kits intended for DNA & RNA extraction from soil and clay. (Patent EP2 443 251)
